

GAS RELEASE ASSIST UNITS (VACUUM GENERATOR)

Heat resistance temperature: M—VCL (60°C)
M—VCLH (120°C)

M—VCL

M—VCLH

M—VCL
M—VCLH
(for high temperature)

Material		M—VCL	M—VCLH
Joint part		Brass+Electroless nickel plated	Brass+Electroless nickel plated
Seal rubber		Nitrile rubber	Fluorid rubber
Main body		Aluminum	Aluminum
Silencer		Polyvinyl formal	SUS304
Thread		Sealing material application	None

Usable temperature range: M—VCL (0~60°C), M—VCLH (0~120°C) Usable pressure range: 0.15~0.7MPa, Rated pressure supply: 0.5MPa
M—VCLH (for high temperature) is delivered without silencer embedded in the main body.
For use, make sure to remove the exhaust part and embed a silencer.

Days to Ship Quotation

Price Quotation

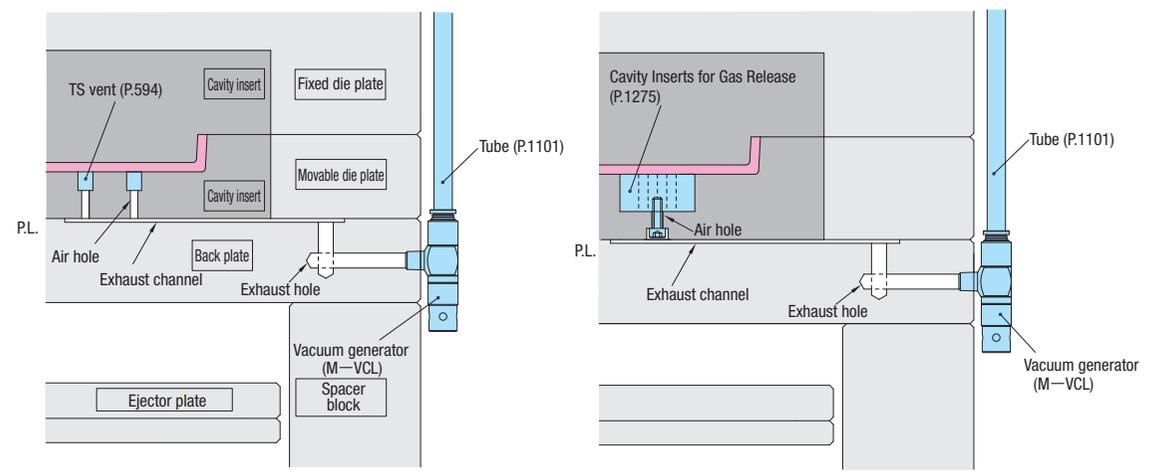

Compressed air	Vacuum flow rate	Degree of vacuum	Exhaust flow rate
0.5MPa	42ℓ/min (ANR*)	-66kPa	46ℓ/min

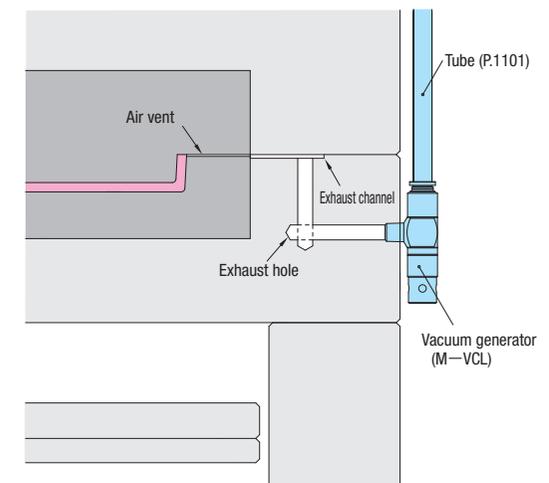

* ANR (Atmosphere Normale de Reference)
Reference normal atmosphere (Temperature: 20°C; Absolute pressure: 101.3kPa; Relative humidity: 65%)

When used to support gas release from the cavity inserts for gas release · gas vent, etc

When used to support gas release from the gas vent on the PL side

- Notes**
- Usable temperature range: M—VCL (0~60°C)
M—VCLH (0~120°C)
 - Usable pressure range: 0.15~0.7MPa
 - Rated pressure supply: 0.5MPa
 - Use clean air for compressed air as long as possible.
(Otherwise, foreign materials may adhere inside the equipment and deteriorate its functionality.)
 - Because the material of the M—VCLH (for high temperature) silencer is SUS304, it may be washed and reused. (not possible for M—VCL)
 - Silencer (built-in part) can be used even after removal. (Exhaust noise is increased to some extent, but it does not affect functionality.)

Resin which generates gas easily

- ACS resin
- PC (Polycarbonate)
- ABS resin
- PC/ABS (Alloy)
- POM (Polyacetal)
- Modified PPE (Modified polyphenylene ether)
- Modified PPO (Modified polyphenylene oxide)
- PP (Polypropylene)
- TPE kinds (Thermoplastic elastomer)
