Example

- Fit the jig to the nut fastened the plasticizing cylinder to loosen it.
- If it cannot be loosened, insert the pipe type jig into the handle and turn the jig.
- ⚠ When performing maintenance on the molding machine, check the Sodick's instruction manual and implement appropriate safety measures against burns and electric shock, etc.
- ⚠ Perform the necessary preparations for removing the plasticizing cylinder, such as removing the plasticizing motor and non-return unit.
- ⚠ In particular, be careful not to let the jig slip off or be damaged when using a pipe type jig.
- ⚠ Pipe type jig P.70
