

# NOZZLE HEATER GUARD / HEAT RESISTANT STRAP BELT

## ■ Nozzle Heater Guard

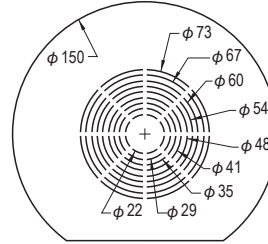

M-HBP

## ■ Features

- Heater guards can protect nozzle heaters and band heaters from resin scattered from the gap between the nozzle and screw bushing during molding.
- M-HBP524 is slitted and can be easily cut to the desired inner diameter.
- The guard is made of glass fiber with high heat resistance and durability, which protects the heater for a long time.

## ■ M-HBP524 slit size

Operating temp.	Thickness	Outer dia. (φ)	Type	Part Number		Unit Price 1~2 pcs
				Type	No.	
370°C	5	With D-cut 150	With slit	M-HBP	524	Quotation
			Without slit		635
