	0.23~0.51	Yellow	12	M-MPY1-12	

■ Features

- A gauge that measures the gap between parting lines.
- Since the gap is measured at the width where the gauge is squeezed and expanded, it is possible to measure curved surfaces and parts out of sight.
- It is made of soft petroleum wax, preventing damage to the workpiece.

■ How to Use

- ① Wipe oil and dirt off the workpiece.
- ② Insert a plastic gauge cut to a suitable size into the workpiece and squeeze it.
- ③ Measure the expansion width according to the scale on the bag.
